Dear Viewer,

If you are reading this letter then you have Acrobat Reader installed on your system and you can take advantage of the cutting edge that PDF technology can apply to word processing.

Your handwritten document is faxed to our office where it will be typed up, laid out and converted to a PDF file. It will then be emailed back to you.

On receipt, your only action is to click on the printer button. Your letter will be printed out exactly as you see it on the screen.

Go ahead. Try it with this sample. No more fetching and carrying and whether you are 1 mile or 100 miles away, the response will still be the same.

Welcome to the 21st Century!
